

Tress Stilo, suspension design Marc Sadler 2011

FOSCARINI

The seduction of a woman's tress was the initial inspiration for the Tress family of lamps. This design-come-true by Foscarini was achieved through the development of a completely original technological process, involving a fiberglass and resin tape woven with orderly casualness to become the structure and aesthetics of the lamp. Tress changes personality according to its colour: it is light and discrete in white, strong and decisive in black and volcanic and totemic in red, which makes the contrast between the interior and the exterior even more evident. Elongated,

thin and slender, Tress Stilo like an exclamation mark or a tribal object has a strong and suave graphic design. In contrast to the highly technological innovation that went into its development, Tress Stilo's shape recalls an artisanal, hand-made object. Its elongated silhouette is ideal to personalize the corner of a room and any other setting where a compact, yet visually strong lamp is required. The suspended version is also available with a Led light source for reduced energy use.

Tress Stilo, suspension technical info

FOSCARINI

Description

Suspension lamp with direct light. The fibreglass-based composite material diffuser is produced by modelling tape along a mould with an automatic control of the pitch/pattern, which is then liquid coated. Stainless steel and polycarbonate mount housing the light source. Transparent electrical suspension cable, ceiling rose with galvanised metal bracket and glossy chromed batch-dyed ABS cover. Canopy decentralisation kit - multiple canopy available (up to 9 suspension lamps).

Materials compound material on lacquered glass fibre base and steel

Tress Stilo, suspension multiple composition

FOSCARINI

Description

A technical solution that couples function with design harmony: The multiple ceiling flange of Foscarini makes it possible to create compositions up to 9 suspension lamps to create cascades of light of high emotional impact, particularly suitable to enrich a stair case. The standard multiple flange is designed to suit a large number of suspensions from both Foscarini and Diesel with Foscarini collections.
